Response to Amendment

Claim Objections

1. Claims 1-2 and 5 are objected to because of the following informalities:

In claim 1, line 1, after “for”, --preventing unauthorized removal-- should be inserted back to complete the phrase. Claims 2 and 5 depended on claim 1 are similarly objected due to claim dependency.

Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-2 and 5-12 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6,653,940. Although the conflicting claims are not identical, they are not patentably distinct from each other because:

Art Unit: 2632

Since the patented claims are directed to the same invention, it would have been obvious to one of ordinary skill in the art at the time of the claimed invention that the non-dependent claims are combinable into a single embodiment since they are usable together. Furthermore, while the patented claims do not specify that the core has a length of between 2 ¼ and 3 ¼ inches and that the paper roll is specifically a paper register receipt roll, it would have been obvious to one of ordinary skill in the art at the time of the claimed invention that the paper roll encompasses known paper rolls including the claimed type paper roll as an intended application/use of the patented method/system for preventing unauthorized removal of the paper roll.

Response to Arguments

4. Applicant's arguments with respect to claims 1-2 and 5-12 have been considered but are moot in view of the new ground(s) of rejection. See above Double Patenting rejection for detail.
